# Wet mopping – in one step (direct method) with pre-soaked mop (WetBox system)

## Description

### Definition/Objective

**Remove loose dirt in one step** with the pre-soaked cleaning **textile**. Suitable for waterproof and water-sensitive, non-textile floor coverings. **The most efficient method for wet mopping.**

Note: Use a fresh mop for each room to ensure maximum hygiene.

### Preparatory work

Select suitable products according to the surface to be cleaned (type/square metres) and the type of soiling.

Add the required number of mops to the WetBox and place the soaking unit on top.

Fill the bucket with cleaning product according to the dosing instructions.

To ensure that the mops are evenly moistened, pour the correct amount of cleaning solution into the soaking unit.

Put up the warning sign.

Remove any loose dirt (dust-binding mopping or dry vacuum cleaning).

### Main task

Take a pre-soaked mop from the WetBox and attach it to the wet mopping unit.

First mop along the edges of the room and under furniture, then mop the open space in slightly overlapping lines.

Change the mop when it gets dirty and put it with the dirty laundry.

Perform a visual check.

### Final steps

Remove the warning sign once the floor is dry.

Wash used mops in the washing machine.

Dispose of any waste.

Clean the cleaning equipment and replace if necessary.

### Comments

- Wear the personal protective equipment (PPE) required by company regulations, safety data sheets or operating instructions.

- Always check in advance which product meets your requirements (see Wetrok Cleaning & Care Instructions).

Wetrok AG assumes no liability for damage caused by improper use or incorrect product selection.
